#### **VERSION OF AMENDMENTS SHOWING MARKINGS**

## In the Claims

## 1 - 7. (Canceled)

- 8. (Previously Presented) A method of applying a water treatment composition to an article comprising the steps of:
  - a) applying an adhesive to a web of material;
  - b) applying a metal ion yielding material in particle form to the adhesive on the web;
  - c) allowing the adhesive to dry\_to secure the metal ion yielding material to the web of material; and
  - d) forming the particle containing web into an article for use in water purification.
- 9. (Original) The method of claim 8 wherein the particle containing web is formed into a filter.
- 10. (Original) A method of making an article for insitu water treatment comprising the steps of:

selecting a water treatment material from the group consisting of zinc sulfate, zinc carbonate, zinc chloride, copper chloride, copper carbonate, copper sulfate, silver chloride, stannous chloride and stannic chloride;

selecting an adhesive from the group consisting of polyurethane, epoxy resin, polyvinyl acetate and polyvinyl alcohol;

selecting a water insoluble solid structure;

applying the adhesive to the water insoluble solid structure to form at least a partial coating thereon;

applying the water treatment material to the adhesive on said solid structure; allowing the adhesive to set to thereby secure the water treatment material to the solid structure; and

forming the structure into an article for placement into a body of water to thereby enable the structure to adhesively support the water treatment material thereon in a condition that maintains a water concentration of metal ions less than 1000 parts per billion (ppb).

# 11. (Withdrawn)

12. (Original) The method of claim 10 wherein the selected adhesive is sprayed on the solid structure and the selected water treatment material is applied to the adhesive on the structure.

#### 13 -20. (Withdrawn)
